

Chile Biliary Longitudinal Study - Chile BiLS

Information system

Data Capture: Redcap

Databases:

1. Household census (Household ID):

- Household enumeration by block, identification of all woman 50-74 years, invitation to eligibles

2. Baseline visit (Subject ID):

- Recruitment
- Consent process
- Ultrasound
- Blood sample collection
- Questionnaire
- Anthropometric measures/tooth count

3. Laboratory processing (Subject ID)

- Samples processed/stored

Data Capture: Redcap

4. Follow up (Specimen ID):

- Cholecystectomies
- Year 1, 3, 5 contacts
- Year 2, 4, 6 follow up visits

5. Pathology (Specimen ID):

- Specimen processing (bile, stones, gallbladder tissue)
- Gross pathology
- Full gallbladder mapping

Access to data and samples

Collaboration requests must be submitted in writing to the Principal Investigators, Jill Koshiol (koshiolj@mail.nih.gov) and Catterina Ferreccio (cferrec@med.puc.cl)

For collaborations in Pathology studies, requests should also be submitted to study pathologist Juan Carlos Araya (jcaorostica@gmail.com).

Study Proposals must be in line with Chile BiLS objectives and covered under the Informed Consent Document.
